PROFESSIONAL SUMMARY

Senior product and portfolio leader with 18 years in technology, including 13 years owning products and portfolios end to end. My strength is taking ambiguous, cross-cutting problems and converting them into structured decisions — working through engineering, architecture, finance, and business leadership to get them delivered. Most recently designed and built five production AI agents that replaced a manual intake process, returning seven FTEs of capacity (approximately \$1.3M annually) and cutting pipeline time in half. Deep experience in SAFe, WSJF-driven prioritization, and portfolio governance at enterprise scale.

CORE SKILLS

Product & Portfolio Leadership: Product Lifecycle Management, Roadmap Ownership, Portfolio Prioritization, Demand Intake, WSJF, SAFe, PI Planning, Backlog Strategy, Discovery, Stakeholder Alignment, Executive Governance

AI & Automation: Generative AI, LLM-Based Agents, Agentic Workflows, Prompt Engineering, Retrieval-Augmented Generation, AI Governance & Adoption, Microsoft Copilot Studio, Agent Builder, Power Automate

Data & Delivery Tools: Jira, Aha!, Tableau, ServiceNow, ROI & Benefits Modeling, KPI Definition, Value Realization, Process Optimization

Business & Influence: Executive Presentations, Voice of Customer, Market & Competitive Analysis, Change Management, Coaching & Enablement

PROFESSIONAL EXPERIENCE

CDW, LLC

Fortune 500 technology solutions provider · Vernon Hills, IL

Portfolio Management, Innovation & AI | January 2025 – Present

- Cut idea-to-decision pipeline time by 50%, removing three weeks from the process, by designing and building an agentic intake pipeline that replaced a manual, meeting-driven workflow.
- Returned seven FTEs of capacity — approximately \$1.3M annually — through five production AI agents and skills that absorbed the work after those roles were eliminated.
- Drove adoption from 20% post-beta to 100% by retiring the legacy intake form, a decision I proposed and carried through leadership approval; every technology demand now enters through the agent.
- Reduced task time by 75% across roughly 45 demands per month (about 540 per year), measured against the manual baseline.

- Scaled AI tooling across all 120 delivery teams in Technology, making the intake platform available to any CDW coworker.
- Led portfolio demand intake and prioritization across 6 ARTs and 7 programs, partnering with 23 VP-level sponsors to validate benefits spanning cost savings, revenue protection, risk reduction, and process efficiency.
- Scored every portfolio item on WSJF, NoVaK, and ROI, and delivered prioritized backlog recommendations spanning every delivery team each program increment — giving leadership one consistent, data-driven basis for tradeoff decisions.
- Built and led an AI community of practice — roughly 20 dotted-line contributors across structured delivery cycles — through hands-on training, reusable prompts, office hours, and co-development cohorts.
- Established AI governance and portfolio visibility through a centralized agent catalog, a standardized status taxonomy, and executive reporting on adoption, progress, and realized value.

ART Product Manager & Portfolio Management | October 2022 – January 2025

- Represented and coordinated priorities across 30+ teams, aligning stakeholders and driving ART-level planning, execution, and communication.
- Owned backlog strategy and prioritization with Product Owners, aligning work to customer value, effort, capacity, and business outcomes.
- Standardized WSJF prioritization across features and epics, improving consistency, transparency, and planning predictability.
- Facilitated PI Planning and tradeoff decisions by synthesizing priorities, validating dependencies, capturing program objectives, and communicating risk across ARTs.
- Coached Product Managers, Product Owners, and delivery teams on SAFe-aligned practices, improving backlog quality, readiness, and cross-team coordination.

Motorola Solutions

Global mission-critical communications provider · Schaumburg, IL

Product Manager, Secure Products Group | August 2013 – October 2022

- Managed prioritization and backlog for a \$150M portfolio using Jira and Aha!, aligning product investments to value, feasibility, and delivery capacity.
- Led strategy and development for a \$24M product portfolio, collaborating with clients, engineering, sales, support, marketing, and senior leadership in a SAFe Agile environment.
- Owned full product lifecycle activity across mission-critical internal and customer-facing products, from discovery and roadmap advocacy through execution and delivery.
- Drove data-informed decision-making through Tableau dashboards, revenue forecasting, product performance analysis, voice-of-customer research, and competitive analysis.
- Led cybersecurity and compliance initiatives, ensuring product alignment with industry standards and customer expectations.

Earlier Motorola Roles — Operations, Support & Team Leadership | June 2008 – August 2013

- Built foundational experience across network monitoring, customer support operations, workflow management, technical dispatch, and public-safety system support.

- Managed workflow, schedules, escalation support, case documentation, quality audits, and training programs while leading teams of up to 25 call center agents.

Valley View School District 365U

Romeoville, IL

Teacher | 2007 – 2008

AI SOLUTIONS BUILT & DEPLOYED

- Idea Intake Agent — conversational capture that replaced the legacy intake form; now the sole entry point for all technology demand.
- Team Identifier Agent — predicts impacted delivery teams and splits scope by team using historical portfolio data.
- Sizing Estimator — generates effort estimates from scope, team count, and timeline for delivery teams to validate.
- ROI Calculator — produces benefit and ROI framing, including BV, RR, NoVaK, and WSJF inputs, for every request.
- One-Page Creator — synthesizes vetted inputs into a leadership-ready, one-page business case.

CERTIFICATIONS

CompTIA Security+ — issued February 2021

Pragmatic Institute Certified Product Manager — issued April 2020

Microsoft 365 Copilot — learning credential

EDUCATION

Master of Business Administration, Keller Graduate School of Management — December 2013 | GPA 4.0 / 4.0

Bachelor of Science in Mathematics, Elmhurst College — May 2007, Magna Cum Laude | GPA 3.8 / 4.0
